

aegis' Quad Viewer is The Best Teaching Assistant

Overview: Private Lessons and Small Class

A computer graphic teacher, Mr. Hou, who runs his private lessons only as he values the learning process and effective of his teaching. He was seeking an educational tool that could help him to show his graphic operation in the computer while see his students' operations without walking around the classroom constantly. Moreover, the cost of such tool has to meet his budget and not taking too much of space. aegis' 4KVIEWER-KVM-4 has not only met his inquiry but also offering more functions that add features to his teaching and increase the effective of his lessons.

CHALLENGES

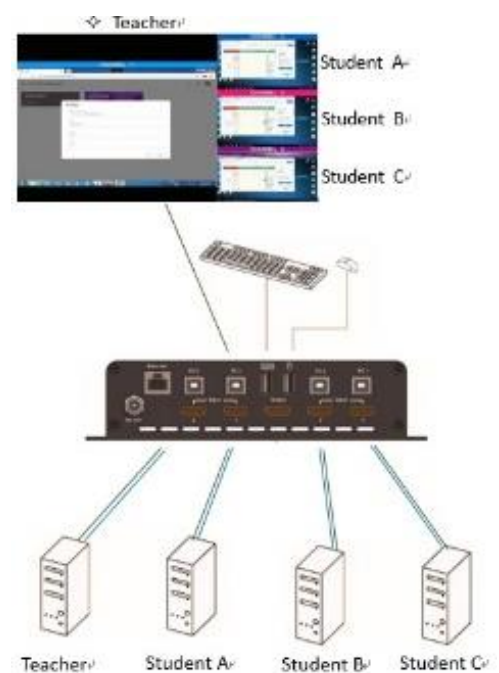

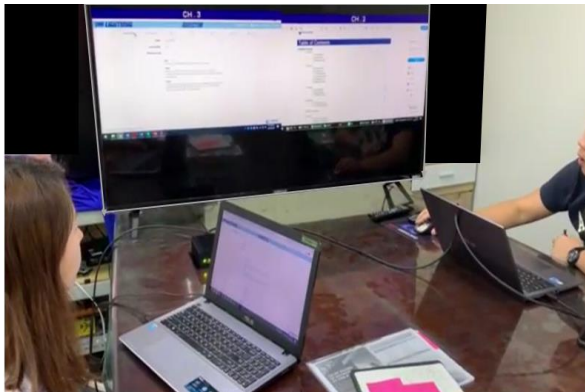

In most of teaching environment, a teacher stands in the front of class to give lesson and to use a projector to show students his/her lesson on the screen. For Mr. Hou's private lessons that taking maximum 4 students in a class, the classroom is therefore small and may not have necessary teaching equipments in the room. He was asking for :

- An equipment that size is small and best to be mobility.
- Can show both the teacher's and students' computer screens at one display screen.
- Simple set up without software or complication
- To have flexible layout as teaching needs
- Easy to operate
- Durable and affordable

SOLUTION

aegis'4KVIEWER-KVM-4 is an advanced and high performance quad view system that allow users control and manage up to 4 PCs via a set of keyboard / mouse. It provides Quad View, Picture in Picture (PiP), Picture by Picture (PbP), Picture on Picture (PoP), Full Screen and free layout style.

Mr. Hou has looked for his ideal teaching tool for a long period of time and occasionally, 4KVIEWER-KVM-4 was introduced to him and decided to use it right a way. He just needs to plug USB type B and HDMI cables to connect between his computer and 4KVIEWER-KVM-4. Same method between student computers to 4KVIEWER-KVM-4. Then use a HDMI cable to transmitt all 4 computer visuals to the project or a screen. Plug a set of Keyboard / Mouse via USB type A

to the unit. No software needed. Simple plug and play. The resolution is up to 4K/30hz which satisfied the teaching needs. Moreover, the price was affordable in relative to other educational equipments.

FEATURES

- **Highly Free Operation** –The 4KVIEWER-KVM-4 provides preset and free style modes that allow users to drag, resize and reposition the images. Mr. Hou can double click on the picture that he wish to see or to let his students see in full screen. Also he can switch the pictures of the 4 computers.
- **High Compatibility** – Console keyboard mouse emulation/ by pass feature that support most multimedia keyboard, mouse and multifunction mouse, including wireless mouse.
