

## 14-in-1 USB-C 8K Docking Station

# DSP-USBC-1000

DSP-USBC-1000 is a 14-in-1 USB-C docking station designed for both Windows and Mac systems. With a single cable, it connects your laptop to up to three displays and a variety of peripherals. Supporting up to 8K60Hz video output and wireless charging, it features diverse ports and high-speed data transfer capabilities, delivering a stable and efficient user experience.

### Video Output

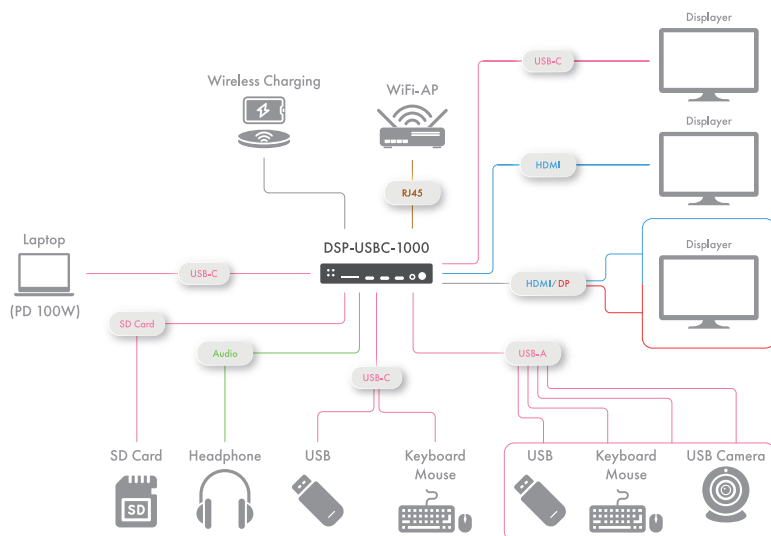

- Single-screen output: Supports resolutions up to 8K60Hz
- Dual-screen output: Supports resolutions up to 4K60Hz
- Triple-screen output: Supports resolutions up to 4K30Hz
- Supports MST mode (Windows only) and SST mode

### Diverse Connectivity Options

- USB-C 3.2 Gen2 x2, USB-A 3.2 Gen1 x2, USB-A 2.0 x2
- SD 4.0 card slot, ideal for photographers and designers
- RJ45 Ethernet port, supporting 10/ 100/ 1000Mbps with WOL, jumbo frame, and VLAN tagging capabilities
- 3.5mm audio port, compatible with headphones and microphones for high-quality audio

### Advanced Features & Hardware Design

- USB-C PD3.0 supports 100W power delivery, reducing the need to carry extra chargers
- Wireless charging with dual-coil technology, supporting Quick Charge 2.0, 1.4x faster than standard wireless chargers
- Supports DC 24V 5.5A 132W power input for stable operation
- Equipped with an anti-slip fixing slot and LED status indicators for intuitive operation

### Application Scenarios

#### ✓ Business Operations

Simultaneously handle multiple documents, video conferences, and instant messaging for improved productivity.

#### ✓ Creative Design

Manage original materials, editing content, and output results efficiently across multiple screens.

#### ✓ Gaming Entertainment

Enjoy 8K resolution and multi-monitor displays, providing gamers with a wider field of view and immersive gaming experiences.

#### ✓ Everyday Use

Connect multiple devices (such as monitors, speakers, and hard drives) to create a home entertainment center for audiovisual enjoyment.
